

SOCKET FSA09

Product picture

[PRODUCT DESCRIPTION]

Ground-fault interrupter is an unintentional electrical path between a source of electrical current and a grounded surface. Electrical shock can occur if a person comes into contact with an energized part. GFCIs (ground-fault circuit-interrupters) can greatly reduce the risk of shock by immediately shutting off an electrical circuit when that circuit represents a shock hazard (a person comes in contact with a faulty appliance together with a grounded surface). They are characterized by their adaptability to diversification of architectural specification .

[TECHNICAL SPECIFICATION]

- positive protection against electronic shock.
- They will operate well because of overheating. and waterproof.
- They will operate at their design speed.

[ORDER INFORMATION]

Part number	Description	Standard Color	Inner box	Carton	Carton measurement	Carton weight
FSA09	ground socket	Gold	1PC	---	---	---
FSP09	AMP modular board	Beige	1PC	---	---	---
FSP11	Commscope modular board	Beige	1PC	---	---	---
FSP27	black board	Beige	1PC	---	---	---
