

GROUND SOCKET P/N: FSD06

S/N: C08-024

GROUND SOCKET, available in two ports, gold.

FSD06

Ground Socket

## DESCRIPTION

Ground-fault interrupter is an unintentional electrical path between a source of electrical current and a grounded surface. Electrical shock can occur if a person comes into contact with an energized part. GFCIs (ground-fault circuit-interrupters) can greatly reduce the risk of shock by immediately shutting off an electrical circuit when that circuit represents a shock hazard (a person comes in contact with a faulty appliance together with a grounded surface). They are characterized by their adaptability to diversification of architectural specification .

## APPLICATION

- positive protection against electronic shock
- They will operate well because of overheating, and waterproof
- They will operate at their design speed

## ORDER INFORMATION

Part number	Description	Standard Color	Inner box
FSD06	ground socket	Gold	1PC

Use \* to specify the color :

A = black B =blue C =red D= orange  
E=yellow F= gray G =green
