

## PRODUCT INTRODUCTION

- Suitable for 8-category shielded systems, connecting 22-26AWG solid wires and 24AWG stranded wires, used for termination of horizontal subsystems; complies with TIA/EIA-568C, YD/T926.3-2009, and ISO/IE11801-2008 standards

## PRODUCT FEATURES

- Comply with T568A and T568B line sequence
- Suitable for 10/100/1000/10G/40GBASE-T Fast Ethernet
- ATM155Mbps/622Mbps system applications
- The most important type of connecting device in a wiring system, consisting of a plug and a socket connected between wires to achieve electrical continuity of the wires
- Communication socket for equipment room and work area
- Unique nickel-plated copper cladding for good shielding
- The socket core adopts 50μ gold plating, the lossless contact insertion are more than 750 times, and the wire port supports more than 200 times after termination
- Contact pin contacts use high and low misalignment technology to effectively reduce Near End Cross-Talk values
- Embedded design, the keystone jack can be installed on the shielded distribution frame to form a modular distribution frame

## ORDER INFORMATION

Part Number	Description	Inner Box	Carton Measurement (LxWxH)
JKS09-SC8	CAT8 shielded keystone outlet	20pcs	53cm*31cm*23cm
